Become your firm’s in-house efficiency guru with

CPA Green Belt Certification
June 19-22, 2018
Tuesday – Thursday, 8 a.m. – 5 p.m.
Friday, 8 a.m. – 12 noon
Wooster, Ohio

ati.osu.edu/greenbelt

Presented by
Ohio State University’s Business Training & Educational Services and
Boomer Consulting Inc.
Why THIS Green Belt Certification Course?

**CPA-focused**... Lots of Green Belt training is available online and across the country, but the OSU/Boomer Consulting Inc. CPA Green Belt Certification program is targeted directly to CPAs. Because it’s designed for you and your firm, the learning curve is shorter – helping you make improvements in your firm much quicker.

**Follow-up coaching**... After the training is over, you will receive remote coaching with your own process improvement project by Dustin Hostetler, Lean Six Sigma Master Black Belt. This gets you to the true application and immediate benefit of your CPA Green Belt Certification!

**Electronic files provided**... That’s right, BRING YOUR LAPTOP! All of the course materials will be emailed to you prior to arriving for the course. These will be yours to use during the four-day program, yours to work with based on your project(s), yours to take with you.

**You’ll also become a member** of the Class of 2017 OSU/Boomer Consulting Inc. CPA Green Belt Certification User Group. We’ll hold periodic calls during your projects to help promote sharing, brainstorming and networking. The User Group calls will focus on the key Lean concept of continuous improvement after project completion.

About the Instructor

**Dustin Hostetler**

Dustin, a Shareholder and Consultant at Boomer Consulting, Inc., is a Lean Six Sigma Master Black Belt. He is the pioneer in applying Lean process improvement concepts within public accounting firms. Over the past several years, Dustin has worked with over 100 top CPA firms and has overseen more than two hundred projects to improve processes in the areas of individual and corporate tax, auditing, payroll, pension administration and bookkeeping. Dustin is revolutionizing the way CPA’s view processes and creating better experiences and results for clients.

“Will get you thinking about your flows & processes and their impact on your ‘product,’ staff and costs of doing business.”
As a certified CPA Green Belt, you will become your firm’s in-house efficiency guru, the one who understands Lean concepts and process improvements. You will be the “flowtivity” expert, taking your firm beyond what is generally considered productivity improvements in CPA firms. Learn how to use the powerful concepts of Lean, combined with project management and workflow management techniques, to improve the efficiency and bottom line performance of your firm.

You’ll be able to facilitate additional Lean projects in your firm and you’ll soon begin to see that efficiency goes way beyond new technology. To truly impact the bottom line in your firm and deliver greater client satisfaction, you need to improve your processes.

Who should attend
This course is designed for rising leaders within CPA firms, which includes manager and partner level CPAs, but consultants and members of your manufacturing segment team will also find it valuable. This course is for you if you want to learn how to apply the powerful Lean Six Sigma methodology to your firm, and potentially your clients.

What you’ll learn
In addition to a toolbox of Lean and Six Sigma tools that will help you with your problem-solving and process improvement projects, you’ll learn the following key items from this course:

• Breakthrough process improvement strategies for your firm, including Lean, project management and workflow management strategies that are proven to improve performance.
• Effective communication strategies and applications of these concepts to your clients – training and developing you to become a better, more-trusted advisor.
• How to effectively facilitate a team and gain much needed buy-in and accountability to changes within your firm.
• How to identify what clients value and improving your processes to match them.
• How to identify and eliminate bottlenecks in processes
